

Deurali-Janata pharma to take big leap in 10 years

BY OUR REPORTER

The Deurali-Janata Pharmaceuticals has started producing new drugs for long-term medication through its new health division. The company, which is a leading Nepali company, said that it had started marketing drugs for heart, nerve and communicable diseases.

Speaking at a press conference last Wednesday, the company said that the new division was established for providing high quality medicines in the country at a reasonable price.

The company, which had entered into agreement with Renata of Bangladesh for technological transfer, is producing 80 varieties of medicines of international quality. Executive Director of the company Haribhakta Sharma said that the company would make big leap in pharmaceutical business in the next 10 years.
