

FEROFOLIC Plus

Ferofolic Plus Capsule

Each Capsule contains: Iron (III) Hydroxide Polymaltose Complex equivalent to Elemental Iron 100 mg + Folic Acid 0.5 mg and Cyanocobalamin 5 mcg

Ferofolic Plus Syrup

Each 5 ml contains: Iron (III) Hydroxide Polymaltose Complex equivalent to Elemental Iron 50 mg + Folic Acid BP 0.5 mg and Cyanocobalamin BP 3 mcg

Also Available as:

FEROFOLIC DROPS:

Each ml contains:

Iron (III) Hydroxide Polymaltose complex equivalent to Elemental Iron	20 mg
L-Lysine Monohydrochloride USP	150 mg
Folic Acid BP	0.2 mg
Cyanocobalamine (Vit.B12) BP	4 mcg

Available as 15ml bottle

Ferofolic Drops

Each ml contains Iron (III) hydroxide polymaltose complex equivalent to elemental Iron **20 mg**.

The general requirement in anemic patient is 10mg per day of which 1 mg is absorbed. The Iron requirement doubles during pregnancy from 15-30mg per day.

Daily elemental iron is needed for the first 15 years of life to increase the total body iron from 0.5 grams (newborn) to 5gm (adult). To do so 0.8-1.5mg of elemental iron is needed daily (since only 10% of elemental iron is absorbed from the diet through the jejunum, the daily elemental iron requirement is 8-15mg daily).

IRON HYDROXIDE POLYMALTOSE

Iron hydroxide poly maltose complex is a water soluble, iron oxide. It is used in treatment of latent iron deficiency and iron deficiency anaemia. The iron polymaltose complex has been formulated in such a way that the elemental form is in a nonionic state. This ensures that there is no gastric irritation with iron polymaltose complex. In addition, the high elemental iron content of IPC eliminates the need for frequent dosing and therefore improves compliance.

Vitamin B12 is an essential water-soluble vitamin that plays an important role in supplying essential methyl groups for protein and DNA synthesis.

Folic acid is used for preventing and treating low blood levels of folic acid (Folic Acid Deficiency), as well as its complication, including ‘tired blood’ (Anemia) and the inability of the bowel to absorb nutrients properly.

INDICATIONS

- Ideal Supplement during Pregnancy and Lactation
- Prevention and Treatment of Iron, Vitamin 12 and Folic Acid Deficiency
- In Iron Deficiency Anemia of
 - ✓ Menorrhagia
 - ✓ Malabsorptions
 - ✓ Worm Infestations
 - ✓ Pregnancy and Lactation

DOSAGE & ADMINISTRATION

Ferofolic Plus Capsule

Adult: 1- 2 Capsules daily as recommended by the physician

Children: 1 capsule daily as recommended by the physician

Infant: As recommended by the physician

Presentation: 30 Capsules x 10 Blisters

Ferofolic Plus Syrup

Adult: One Tea Spoonfull (5 ml)two times a day

Children: Half Tea Spoonfull (2.5 ml) two times a day

Presentation: 200 ml
