

SEPTIDINE

SEPTIDINE Solution- Povidone-Iodine 5 % w/v Solution
Available in 50 ml & 100 ml Bottle Pack

SEPTIDINE Ointment- Povidone –Iodine 5 % w/w Ointment
Pack Size: 15 gm

THERAPEUTIC CATEGORY: Antiseptic

MECHANISM OF ACTION

Free iodine, slowly liberated from the povidone-iodine (PVP-I) complex in solution, kills eukaryotic or prokaryotic cells through iodination of lipids and oxidation of cytoplasmic and membrane compounds. In PVP-I, iodine is carried in a complexed form and the concentration of free iodine is very low. The product thus serves as an iodophor. Slow release of iodine from the PVPI complex in solution minimizes iodine toxicity towards mammalian cells.

INDICATIONS

Following the discovery of iodine by Bernard Courtois in 1811, it has been broadly used for the prevention and treatment of skin infections, and the treatment of wounds. SEPTIDINE can be effectively used as/in:

- Cleaning agent for abrasions
- Antiseptic for cleaning lacerations
- De-germing agent for superficial burns
- Minor cuts, Infected wounds, or Ulcers
- Boils and furunculosis
- Preparation of skin before surgical procedures
- Treatment of fungal and bacterial skin infections and pyodermas

DOSE

Povidone-iodine preparations	Areas of use*
4% solution in alcohol	Surgical hand disinfection (5 minutes); before injections (1 minute), before punctures (3 minutes), paint before operation (5 minutes).
10% solution in water	disinfection of injured skin (1 minute)

A UNIQUE COMPLEX with UNIQUE features:

- ✓ **Non- Irritating**
- ✓ **Non- Toxic**
- ✓ **Non- Staining**
- ✓ **Immediate onset of action**
- ✓ **Prolonged Germicidal action**

SEPTIDINE GARGLE

Generic Name: Povidone Iodine 1 % w/v Solution
Available in 100 ml Bottle Pack

INDICATIONS

- For the treatment of acute mucosal infections of the mouth and pharynx such as
 - ✓ Gingivitis
 - ✓ Stomatitis
 - ✓ Tonsillitis
 - ✓ Pharyngitis
 - ✓ Mouth Ulcers
- It is also used for the prevention of infections during and after dental and oral surgery.
