

HEPAPROT TABLET

Generic name:	L-Ornithine-L-Aspartate +Pancreatin
Category:	Hepatoprotective
Composition:	Each tablet contains L-Ornithine-L-Aspartate 150mg+ Pancreatin 100mg
Presentation:	10 Tablets X 10 Blisters

MOLECULAR INTRODUCTION

L-ornithine-L-aspartate is a stable salt of the constituent amino acids which improves impaired ammonia detoxification. It is crucial in converting ammonia to urea and glutamine. The formation of Urea and Glutamine utilizes excess ammonia. This results in detoxification.

MECHANISM OF ACTION

L-Aspartate serves as a stimulus for hepatic glutamine synthesis, which may be defective in acute and chronic liver diseases. The inactive cells are activated and the new cells are generated. Thus, the energy utilization in a damaged liver is improved. Pancreatin, a digestive enzyme, is composed of amylase, lipase and protease. Pancreatin aids in the proper digestion of food.

INDICATIONS

- Liver encephalopathy
- Acute and chronic hepatitis, manifested in hyperammonemia
- Fatty liver
- Alcoholic liver damage
- Adjunct to hepatotoxic drugs
- Cirrhosis
- Post hepatitis convalescence

DOSAGE and Administration

- 1-2 enteric coated tablets three times daily to be swallowed whole at mealtimes
- The duration of therapy depends on the course of the disease.
